FINS: 7.0" Futures rear glass fin + 2 SB1
350 Future Systems side fins

FINISH: Sanded or Gloss & Polish

DESCRIPTION: The Rip Stick is a modern, high performance tri fin longboard. The board is thin and has a lot of rocker nose to tail, this allows for tight arc turns and a very fast and responsive feel. The plan shape includes a single concave nose for nose riding support and lift, and a deep double barrel concave underfoot for increased planning , turn acceleration and very fast top end. The Rip Stick is a perfect choice for a surfer looking for maximum turning and hot dog performance in a balanced, good paddling longboard.

All Hammersurf surfboards are made with only the highest quality resin, fiberglass, and foam available. All boards are handmade in the Pacific Northwest USA by Cascade Performance Fiberglass, building fine surfboards since 1972. WWW.HAMMERSURF.COM (541 478-3441)
