+ Future Systems side boxes

FINS: Single 9.5" Futures glass fin
Or 7.0" Futures glass fin w/ 2 SB1
350 Future systems side fins

FINISH: Sanded or Gloss & Polish

DESCRIPTION: The Transformer is designed to be a high performance longboard with a classic outline, rocker line, rail and bottom shape. The template is shaper Gary Swanson's 'Yater' circa 1975. The Transformer has excellent glide for good paddling and wave catching ability. The smooth flowing nose to tail rocker and single concave nose allows the board to trim well down the line and have good lift up front for noseriding. The Transformer surfs excellent as a single fin but can also be fitted with side fins and a smaller (7") rear fin for a more snappy feel. All of the board's attributes make the Transformer a very versatile, user-friendly surfboard able to handle a wide range of surf conditions and ability levels.

All Hammersurf surfboards are made with only the highest quality resin, fiberglass, and foam available. All boards are handmade in the Pacific Northwest USA by Cascade Performance Fiberglass, building fine surfboards since 1972. WWW.HAMMERSURF.COM (541-478-3441)
